Content of Correction:

In the published article, the x-axis labels in Figure 3 were incorrectly identified as the numerical string "123456." The correct labels are (A) pH and (B) Temperature, as shown below. This error has been corrected and does not alter the content, interpretation, or conclusions of the study.

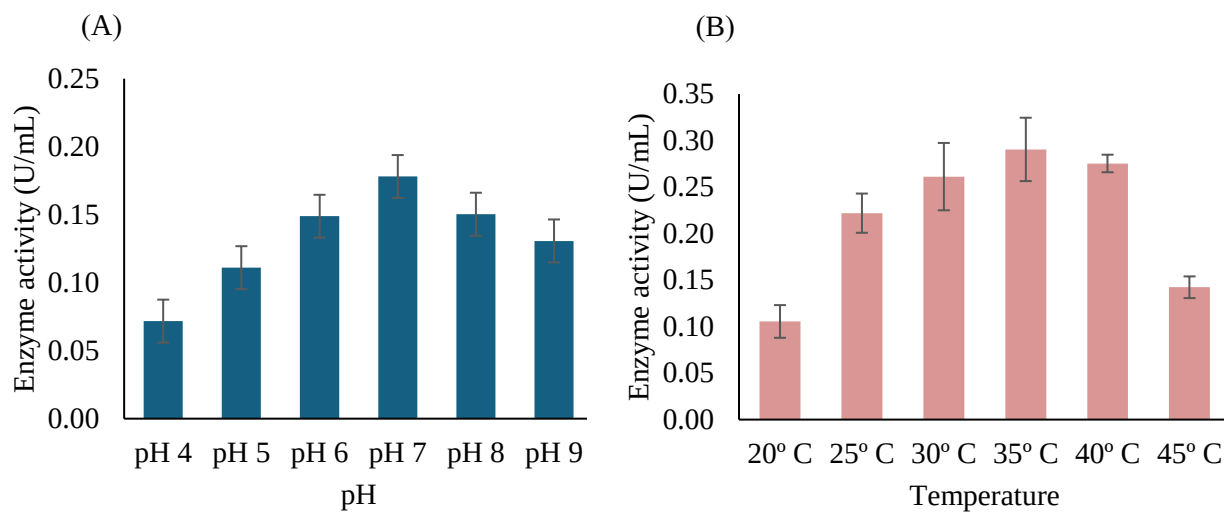

Figure 3 Effect of different physiological parameters on protease activity (A) pH; (B) Temperature; (C) Incubation time and (D) Carbon source.
